Kids Come First®

Helping Families Deal With Divorce & Separation

Dealing with divorce or sorting out your separation is difficult for everyone involved. And if you have children, navigating your way through this complex, often unpredictable, journey can prove even more challenging! As you try to resolve all the legal & financial implications of your separation, it's easy to lose focus on what's most important - your children!

Struggling with their own confusing 'loss' emotions, children are constantly observing your responses and behaviour and depending on you to be strong and resilient - just when you're finding it hard to function at your best! That's why it's so important to find the right specialist support as early as possible - because the better you cope, the better your kids will too!

Kids Come First

offers specialist child-focused support and teaching to suit parents at every stage of their separation with expert practical guidance on how to build better co-parenting relationships.

Booking your place on a workshop in London or Surrey (or via Skype) benefits both you and your children so why not visit www.kidscomefirstuk.co.uk or call us on **07789497275** to discuss taking the first sensible step forward for your family today.
